

JIS 10K Y-Pattern Strainer DN50-DN300

This Y-pattern strainer is designed for use in industrial piping systems. It complies with JIS 10K standards and features flanged connections for easy installation.

Overview

JIS 10K Y-Pattern Strainer

The JIS 10K Y-Pattern Strainer is a robust industrial component designed for effective filtration in piping systems. It is engineered to remove particulate matter from fluid streams, such as water, oil, and gas, thereby protecting downstream equipment from potential damage. Featuring a reliable Y-pattern design and flanged connections, this strainer ensures efficient operation and facilitates straightforward installation and maintenance.

General Specifications

Product Type

Y-Pattern Strainer • Industrial Valve

Standard

JIS 10K

Size Range

DN 50 - DN 300

Technical Details

Key Features

- JIS 10K pressure rating compliance
- Y-pattern configuration for efficient flow
- Protects downstream equipment
- Designed for easy maintenance

Connection Type

Flanged

Suitable Media

Water, Oil, Gas
