Overview

JIS Marine Butterfly Valve

This high-performance butterfly valve is engineered specifically for marine applications, adhering to strict JIS standards. Featuring a robust four-ear mounting design, it ensures secure installation and reliable operation in demanding fluid control environments. The valve utilizes a handwheel and lever mechanism, offering precise flow management for various industrial and marine piping systems.

Technical Specifications

Body Materials	Cast Iron, Ductile Iron
Seat Materials	EPDM, NBR, Viton
O-Ring Material	NBR

Design Features

Mounting Style	Four Ears
Operation	Handwheel and Lever

Compliance

Standard	JIS Marine Standard
