

JIS Non-Rising Stem Gate Valve

This JIS gate valve features a non-rising stem design for industrial applications. It is designed to control fluid flow in pipelines, providing reliable shut-off.

Overview

JIS Standard Non-Rising Stem Gate Valve

This JIS standard gate valve features a non-rising stem design, engineered for reliable fluid flow control in demanding industrial pipelines. Constructed from durable stainless steel, it offers excellent corrosion resistance and longevity in various operating conditions, including high-pressure and high-temperature environments. The manual blue handwheel allows for precise shut-off and flow regulation, making it a robust solution for professional industrial applications.

Technical Specifications

Material Grades	SCS13, SCS14
Valve Type	Non-Rising Stem Gate Valve
Pressure Rating	10K
Nominal Size	40 mm

Features

Key Features

- JIS Standard compliance
- Non-rising stem design
- Stainless steel body construction
- Manual handwheel operation
- Corrosion-resistant materials
