

JIS Stockless Marine Anchor

This marine anchor ranges in weight from 100kg to 20000kg. It is made from steel casting ZG200-400 and is surface treated with blasting and paint.

Product Overview

JIS Stockless Marine Anchor

The JIS Stockless Marine Anchor is a robust anchoring solution designed for efficient deployment and storage in maritime applications. Constructed from high-quality ZG200-400 cast steel, this anchor offers excellent durability and corrosion resistance. Its streamlined, stockless design ensures rapid seabed penetration and secure holding power, significantly reducing the risk of fouling during retrieval.
