Product Overview

Professional Joint Cleaning Solution

This specialized joint cleaning tool is engineered for demanding industrial applications requiring precise maintenance and debris removal. Featuring a robust semi-circular design with a textured, abrasive edge, it ensures efficient cleaning performance. The tool is built with a secure, notched mounting interface, allowing for reliable integration with standard industrial machinery.

Technical Specifications

Design Features

- Semi-circular blade geometry
- Textured abrasive edge for enhanced cleaning
- Notched central mounting hole
- Industrial-grade robust construction

Pipeline Components

Industrial Gate Valve Details

Parameter	Specification
Type	Industrial Gate Valve
Nominal Diameter	DN100
Pressure Rating	PN16
Operation	Manual (Handwheel)

Compliance & Standards

Industrial Standard, Flanged Connection
