

JUKI 506 SMT Nozzle Assembly

This SMT nozzle assembly is compatible with JUKI SMT placement machines. It features a spring-loaded mechanism for controlled release and secure grip of components.

Product Overview

High-Precision SMT Nozzle Assembly

This SMT nozzle assembly is engineered for reliable component placement in high-speed surface mount technology environments. Available in both original and high-quality compatible formats, these assemblies are precision-machined to ensure consistent alignment and secure component handling. They feature robust, spring-loaded designs to support demanding automated assembly operations.

Compatibility

Supported Nozzle Models

- 101-106 series
- 201-204 series
- 500-537 series
- 579-595 series
- 700-701 series

Version Options

Standard, CVS
