

# JUKI 508 SMT Nozzle for Pick and Place Machines

This SMT nozzle is designed for JUKI pick and place machines. It ensures reliable component handling and placement accuracy in automated assembly processes.

## ADDITIONAL IMAGES

## Overview

### High-Precision SMT Nozzle Series

This high-precision SMT nozzle is engineered for reliable component handling and placement accuracy in automated pick and place assembly processes. Designed for long-term durability and optimal vacuum sealing, these nozzles ensure consistent performance and minimal downtime in high-speed manufacturing environments. The range includes extensive assembly configurations compatible with professional-grade automated equipment.
