

JUKI AF8*4mm SMT Placement Machine Feeder

This JUKI AF8*4mm feeder is designed for SMT placement machines. It ensures accurate placement and optimized production efficiency in surface mount technology assembly processes.

Product Overview

Precision SMT Component Feeding

This 8x4mm feeder is precision engineered for reliable component feeding in surface mount technology assembly processes. It is designed to ensure accurate component placement and optimized production efficiency on compatible SMT placement equipment. The unit is available in both original new and copy new conditions to suit various operational requirements.

Technical Specifications

Application

SMT Assembly • Component Placement

Feeder Width	8 mm
Feeder Pitch	4 mm
Condition Availability	Original New, Copy New
