

# JZR350 350-Liter Concrete Mixer

This concrete mixer features reverse rotation for discharging and is suitable for mixing plastic and semi-dry concrete. The mixing drum can handle 0.35m<sup>3</sup> of compacted concrete each time.

## Product Overview

### JZR350 Concrete Mixer

The JZR350 is a gravity-type concrete mixer designed for high-efficiency mixing of plastic, semi-dry, and hard concrete with aggregate sizes up to 60mm. Featuring a reverse-rotation discharge mechanism, it offers a compact, durable construction suitable for construction sites, road and bridge projects, and prefabricated concrete component manufacturing. With a self-contained diesel engine and electrical starter system, this mixer provides reliable performance even in locations without access to mains electricity.

## Performance Metrics

### Productivity

**14 m<sup>3</sup>/h**

Max Productivity

**40 count**

Cycles per Hour

### Mixing Capacity

**350 L**

Discharge Volume

**560 L**

Loading Volume

## Technical Specifications

### Drive System

Parameter	Value
Engine Model	CY1115
Power Output	16.2 kW
Rotation Speed	2200 rev/min
Starting Type	Electrical

### Operational Specifications

- Drum Speed: 17 rpm
- Water Tank Capacity: 65 L
- Max Aggregate Diameter: 60 mm
- Skip Lifting Time: 7 seconds

## Physical Dimensions

### Dimensions & Weight

Attribute	Value
Overall Dimensions	2810 x 2179 x 3070 mm
Total Weight	2100 kg
Wheel Tread	1955 mm
Max Trailed Speed	20 km/h
Tyre Specification	6.50-16
