

K3 Server Cabinet with Vented Doors

This server cabinet features a welded frame and adjustable dimensions for standard 19" installation. High-density vented doors ensure equipment protection, ventilation, and reliable operation.

Overview

K3 Server Cabinet

The K3 server cabinet is designed to house and protect critical server equipment in professional environments. It features a robust SPCC cold-rolled steel frame with a durable powder-coat finish, ensuring long-term reliability and equipment safety. With a static loading capacity of 1000kg and an IP20 protection rating, this cabinet is an ideal solution for data centers, server rooms, and office infrastructure.
