

K4102D Four-Cylinder Diesel Engine

The K4102D is a robust diesel engine designed for diverse industrial applications, including power generation and construction equipment. This four-cylinder, water-cooled engine delivers reliable performance and efficient fuel consumption.

Overview

Reliable Industrial Power

The K4102D is a robust four-cylinder, water-cooled diesel engine specifically engineered for demanding industrial applications. Designed for versatility, it serves as a dependable power source for power generation, construction equipment, and agricultural machinery. With features like a direct injection system and a heavy-duty crankshaft, this engine prioritizes long-lasting operation, efficient fuel consumption, and ease of maintenance.

Technical Specifications

Engine Type	Four-Cylinder Diesel Engine
Cooling System	Water-cooled
Injection System	Direct Injection

Key Features

Design Highlights	Heavy-duty crankshaft, Durable cylinder block, Compact design, Versatile mounting
-------------------	---

Applications

Suitable Applications

- Power generation
- Construction equipment
- Agricultural machinery
