

Keychain UV Index Detector

This portable device measures UV index levels and displays them on a small screen. It includes a keychain attachment for easy carrying and provides audible alerts when UV levels reach harmful levels.

Product Overview

Portable UV Safety Monitor

The Keychain UV Index Detector is a compact, portable device designed to help users monitor UV exposure in real-time. Featuring an intuitive interface, it provides immediate feedback on UV intensity, helping users make informed decisions about sun protection. Its keychain design ensures it is always with you, making it an essential tool for outdoor activities and daily sun safety.
