Overview

Professional Smart Security

The K5(A) Smart Door Lock combines robust 304 stainless steel construction with advanced semiconductor fingerprint technology. Designed for versatility, it supports five distinct entry methods including biometric, NFC, and remote access, ensuring both security and convenience. This lock is engineered to perform reliably across a wide range of environmental conditions and door specifications.

Technical Specifications

Product Dimensions	360mm x 76mm x 26mm
Material Composition	304 Stainless Steel
Door Thickness Range	40mm - 120mm
Lock Body Type	International standard 6068 electronic lock body

Performance Metrics

Key Performance Metrics

0.0001 %
Error Rate

50 ms
Collection Time

60 A
Static Power Consumption

Operating Temperature: -25 to +55

Features

Access Methods	Fingerprint, Password, NFC Card, Remote Control, Physical Key
Power Source	1 Lithium Battery
