Overview

High-Performance Wash Pump

This wash pump is engineered for reliable water circulation and drainage in kitchen appliances. Designed with durability in mind, it features a robust construction suitable for demanding household electrical applications. The unit offers efficient operation with a high flow rate and low noise levels, ensuring optimal performance and longevity for dishwasher systems.

Technical Specifications

Model Number	CD20-3A
Application	Dishwasher, Kitchen Appliance, Household Electrical

Performance Features

Performance Highlights

1 Low Noise

Operation

1 Corrosion Resistant

Durability

Design & Build

Design Features

- Cylindrical motor housing
- Protruding drive shaft
- Integrated electrical connector
- Robust, compact construction
