

Kitchen Drying Cabinet with Digital Controls

This intelligent drying cabinet is designed for kitchen use, featuring a multi-tiered shelving system with integrated fans. The unit has a digital display to monitor and control the drying process.

Overview

Professional Drying Solution

This kitchen drying cabinet is engineered for efficient and uniform drying performance. Featuring integrated fan cooling and precise digital controls, it maintains optimal conditions for various drying applications. The unit is built with a durable stainless steel frame and double glass doors, ensuring both visibility and reliability in professional kitchen environments.

Technical Specifications

Operating Temperature

4 °C

Min Temperature

15 °C

Max Temperature

Voltage	220 V
Frequency	50 Hz
Compatible Refrigerants	R-600A, R134A, R290

Construction & Design

Glass Specification

Low-E Glass

Door Configuration	Double Glass Doors
Door Frame Material	Aluminium
Cooling System	Fan Cooling
Evaporator Type	Copper Fin

Features

Control Interface	Digital Thermostat
