

Kitchen Fume Exhausting Hood

This high-performance fume hood is designed for luxury kitchens. It features a multi-layered filtration system to effectively remove smoke, grease, and odors.

Product Overview

Professional Kitchen Ventilation Solution

This high-performance fume exhausting hood is engineered to maintain clean air quality in demanding kitchen environments. Constructed from premium 304 stainless steel, it offers exceptional durability, fire resistance, and ease of maintenance. With advanced automatic control and high-efficiency filtration, it provides a reliable solution for smoke and odor management.

Performance Metrics

Fume Absorption Rate

95 %

Fume Absorption

Odor Removal Efficiency

65 %

Odor Removal

Technical Specifications

Material	304 Stainless Steel
Control System	Full Automatic Control

Features

Key Features	Fireproof, Easy Maintenance, Automatic Operation, High Efficiency
