

Kitchen Sterilizing Appliance

This kitchen appliance is designed to eliminate bacteria and germs from various items. Its spacious interior can accommodate items such as baby bottles, utensils, and cutting boards.

Overview

Professional Kitchen Sterilizing Solution

This advanced kitchen sterilizer combines UV and OZONE technology to ensure thorough disinfection of your culinary tools and utensils. Engineered with a durable stainless steel interior and a sleek tempered glass exterior, it offers both aesthetic appeal and commercial-grade reliability. The unit features intelligent micro-computer controls and a high-capacity 100L interior, making it an essential appliance for maintaining high hygiene standards in professional kitchen environments.
