

Kitchen Ventilation Range Hood

This kitchen range hood provides effective ventilation and smoke extraction. It features multiple fan speed settings and a removable grease filter for easy cleaning.

Overview

Professional Kitchen Ventilation

The CXW-160-09A2 range hood is engineered for high-efficiency smoke extraction and air purification in professional or residential kitchen environments. Featuring a durable stainless steel construction, this unit combines modern aesthetics with robust performance to effectively manage cooking fumes and grease. Its user-friendly design includes adjustable fan speeds and integrated lighting to ensure a clean, well-lit, and comfortable cooking workspace.
