

Kitchen Ventilation Range Hood

This range hood is designed for kitchen ventilation. It features a multi-layered filtration system, integrated LED lighting, and a user-friendly control panel.

Product Overview

Professional Kitchen Ventilation

This stainless steel kitchen range hood is designed to provide high-performance air filtration for demanding cooking environments. Featuring an integrated multi-layered filtration system, it effectively captures grease and eliminates cooking odors to maintain a clean kitchen atmosphere. The unit is equipped with intuitive controls and integrated LED lighting, ensuring both operational convenience and excellent visibility across the cooking surface.

Physical Properties

Material Composition	High-grade stainless steel
----------------------	----------------------------

Technical Features

Filtration Type	Multi-layered grease and odor filtration system
Integrated Illumination	Integrated LED lighting
Control Panel	Adjustable fan speed and light intensity controls

Certifications & Performance

Build Quality	Durable Construction, Heavy-Duty, Corrosion Resistant
