

Kitchen Ventilation Range Hood

This range hood is designed for kitchen ventilation. It features a cylindrical chimney, a curved glass canopy, and integrated lighting.

Overview

Professional Kitchen Ventilation

This stainless steel range hood is engineered for high-performance kitchen ventilation in professional or residential environments. Featuring a modern cylindrical chimney design paired with a sophisticated curved glass canopy, it effectively manages smoke, grease, and odors. Integrated lighting provides optimal illumination for the cooking surface, ensuring a safer and cleaner culinary workspace.

Technical Specifications

Primary Material	Stainless steel
Design Features	Cylindrical chimney, Curved glass canopy, Integrated lighting
Control System	Black control panel with multi-button interface

Performance

Primary Functions

- Smoke extraction
- Grease filtration
- Odor removal
- Cooking surface illumination
