

Kitchen Ventilation Range Hood

This kitchen range hood is designed for effective removal of smoke, grease, and cooking odors. It features a rectangular housing, a control panel with buttons, integrated lighting, and a stainless steel ventilation system.

Product Overview

Professional Kitchen Ventilation

This high-performance kitchen range hood is engineered to maintain a clean and fresh cooking environment by effectively extracting smoke, grease, and cooking odors. Constructed from durable stainless steel, it offers robust longevity suitable for commercial or high-end residential kitchen settings. The unit integrates a powerful ventilation system with built-in surface lighting, ensuring both operational efficiency and visibility while cooking.

Technical Specifications
