Product Overview

Reliable Electrical Isolation

This knife switch series is engineered for secure electrical circuit isolation and power distribution. Available in various configurations and amperage ratings, these switches feature robust construction with visible break contacts for enhanced operational safety. Designed for both industrial and commercial applications, they provide a dependable manual disconnect solution.

Technical Specifications

Available Configurations

Poles	Rated Current
2P	63
3P	32
3P	100

Key Features

- Visible break contacts
- Manual operation handle
- Easy installation design
- Safety warning indicators

Material Options

Copper, Iron
