

# Knitted High-Pressure Spray Tube

This high-pressure spray tube features full knitting construction for enhanced durability. It is designed for demanding applications requiring resistance to pressure and abrasion.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Spray Solution

This high-pressure spray tube is engineered for demanding applications across agricultural, industrial, and cleaning sectors. Featuring a robust full-knitting construction and a high-strength net layer, it offers exceptional durability, resistance to abrasion, and reliable performance under pressure. Designed to withstand diverse climates, it remains flexible and durable in both alpine cold and subtropical heat, ensuring consistent operation in all four seasons.

## Key Features

### Performance Highlights

**4 seasons**

Seasonal Versatility

**100 High**

Pressure Resistance

### Application Areas

Agriculture, Pneumatic Devices, Orchard Spraying, Civil Engineering, Vehicle Cleaning, Marine Equipment

## Technical Specifications

### Construction Details

- Full knitting reinforcement layer
- High-strength net layer
- Protective outer coating
- High-quality copper end joints
- Reinforced joint protection kits

### Environmental Resistance

UV Resistant • Wear Resistant • Abrasion Resistant • Weather Resistant
