Product Overview

Korean Standard Electrical Solutions

These electrical switches and sockets are engineered specifically for Korean electrical standards, offering reliable performance for both residential and commercial installations. Constructed from high-quality PC material with durable copper and silver contacts, they ensure long-term safety and operational efficiency. The range includes versatile configurations such as single and double sockets as well as standard light switches.

Technical Specifications

| | |
|-------------------------|--------------|
| Switch Operational Life | 80000 cycles |
| Socket Operational Life | 15000 cycles |
| Rated Current | 16 A |
| Rated Voltage | 250 V |

Materials & Construction

| | |
|-------------------|--------------------|
| Housing Material | Polycarbonate (PC) |
| Contact Materials | Copper, Silver |

Features

Safety Features

- Safety shutters on sockets
- Flush mounting design
- Durable thermoplastic construction
