

Korean Style Electrode Holder

This Korean style electrode holder is designed for welding applications. Its insulated handle and jaws provide safe and efficient electrode clamping.

Product Overview

Korean Style Electrode Holder

This Korean-style electrode holder is engineered for demanding welding applications, offering a robust construction that ensures reliability in professional environments. It features an insulated handle and jaws, prioritizing operator safety while maintaining secure and efficient electrode clamping. Designed with ergonomics in mind, this tool provides comfortable handling during extended welding sessions, supported by high-quality materials for long-lasting durability.

Technical Features

Design Features

- Korean-style geometry
- Insulated handle for safety
- Insulated jaws for secure clamping
- Ergonomic grip design

Applications

Welding, Electrical Contact, Industrial Use
