Product Overview

High-Performance KU Band Satellite Solution

The KU60/KU65 satellite dish antenna is engineered for reliable signal reception and transmission in the Ku-band. Built with a robust reflector dish and a durable mounting system, this unit is designed to withstand diverse environmental conditions while maintaining optimal signal clarity. It offers a versatile solution suitable for both residential and commercial satellite TV and data applications, featuring precise alignment capabilities for easy installation.

Technical Specifications

Frequency Band	KU Band
Available Models	KU60, KU65

Installation & Design

Installation Features

- Easy to fix
- Adjustable alignment
- Wall mount compatible
- Versatile surface mounting

Mounting System	J-shaped mounting arm with adjustable clamps
