

L-Shaped Metal Mounting Bracket

This L-shaped metal bracket is designed for securing components at right angles. It features multiple mounting points for secure installation in structural support or mechanical assemblies.

Product Overview

Structural Versatility

The L-Shaped Metal Mounting Bracket is a precision-engineered component designed for secure structural support and mechanical assembly. Featuring a durable matte silver finish, it provides a reliable right-angle connection for various industrial or commercial applications. Its robust design includes multiple mounting points to ensure stability and ease of installation in complex systems.

Technical Details

Finish

Matte Silver • Metallic

Design Features

- L-Shaped geometry for right-angle support
- Integrated rectangular attachment piece
- Secure screw-head mounting interface

Model Number

NFRGH-SA8300D-3

Mounting Points

3
