

L-Shaped Metal Mounting Bracket

This L-shaped metal bracket is designed for securing or supporting components in a mechanical system. The bracket features multiple drilled holes for attachment, suggesting versatility in mounting configurations.

Overview

Professional L-Shaped Mounting Bracket

The NFRGH-SA8300D-1 is a precision-engineered L-shaped metal bracket designed for robust mechanical support and component integration. Featuring a durable brushed metal finish, this component offers excellent corrosion resistance suitable for demanding industrial environments. Its versatile design incorporates multiple drilled mounting points and an integrated alignment pin, ensuring reliable and secure installation in diverse mechanical systems.

Technical Specifications

Mounting Features

- Multiple drilled circular mounting points
- Integrated alignment or pivot pin

Primary Application

Mechanical Systems • Component Support • Industrial Mounting

Model Number

NFRGH-SA8300D-1

Finish

Brushed Metal
