

L-Shaped Segment Grinding Wheel

L-shaped segment grinding wheel is designed for smooth surface grinding on concrete, masonry, granite, marble, and other natural stones. It is available in diameters of 4", 5", 6", and 7" with segment numbers ranging from 8 to 16, and a 5/8"-11UNC arbor.

Product Overview

Professional L-Shaped Segment Grinding Wheels

These L-shaped segment grinding wheels are engineered for high-performance surface grinding across a variety of hard materials, including concrete, masonry, granite, and marble. The specialized L-shaped segment design ensures a smoother grinding action, reducing vibration and improving finish quality. Available in multiple diameters to suit diverse industrial applications, these wheels provide durability and precision for demanding masonry and stone processing tasks.

Technical Specifications

| | |
|----------------------|---|
| Arbor Size | 5/8"-11UNC |
| Compatible Materials | Concrete, Masonry, Granite, Marble, Natural Stone |

Available Models

Concrete & Masonry Models

| Item No. | Diameter (Inch) | Diameter (mm) | Segment Count |
|----------|-----------------|---------------|---------------|
| GWCL04 | 4 | 100 | 10 |
| GWCL05 | 5 | 125 | 12 |
| GWCL06 | 6 | 150 | 14 |
| GWCL07 | 7 | 180 | 16 |

Natural Stone Models

| Item No. | Diameter (Inch) | Diameter (mm) | Segment Count |
|----------|-----------------|---------------|---------------|
| GWGL04 | 4 | 100 | 8 |
| GWGL05 | 5 | 125 | 10 |
| GWGL06 | 6 | 150 | 12 |
| GWGL07 | 7 | 180 | 14 |
