

# Laboratory Glassware Washer Sterilizer Dryer

This machine cleans, sterilizes, and dries laboratory glassware. The type of machine and accessories required are determined by the specific field of science or industry, such as chemistry, biology, or pharmaceuticals, as well as the necessary cleaning process.

## Overview

### Professional Laboratory Glassware Solution

This advanced laboratory glassware washer is engineered to handle the rigorous cleaning, sterilization, and drying requirements of various scientific and industrial sectors. Designed with a robust stainless steel cabinet, it ensures durability and hygiene for organic, inorganic, physical chemistry, biological, and pharmaceutical laboratories. The integrated control system and mobility features provide a user-friendly experience, making it an essential asset for maintaining high standards of cleanliness in critical research and production environments.

## Key Features

### Core Functionalities

- Automated Cleaning
- Integrated Sterilization
- High-Efficiency Drying System
- Advanced Security System

## Application Areas

### Suitable Industries

Organic Chemistry, Inorganic Chemistry, Physical Chemistry, Biology, Microbiology, Hospitals, Pharmaceutical, Food Industry, Cosmetic Industry

## Design & Build

Material	Stainless Steel
Mobility	Yes
