Product Overview

Reliable Lamp Installation

This lampholder is a robust lighting component designed for secure and efficient lamp mounting. It offers excellent electrical insulation and heat resistance, ensuring safe and consistent performance in various residential and commercial settings. With its standard fitting design, it provides a versatile and reliable connection point for a wide range of lamps.

Material & Construction

Body Material	Bakelite
Contact Components	Copper, Aluminum

Technical Details

Category	Lamp Holders • Light Fittings
Lamp Coil Material	Aluminum
