

LAN Cable Tester with RJ45 Ports

This cable tester is designed for testing LAN cables. It features RJ45 ports for verifying cable continuity and pinout.

Overview

Professional LAN Cable Testing Solution

This versatile cable tester is designed for verifying the integrity of UTP/STP RJ45, RJ11/RJ12, and BNC network cables. It features both auto and manual testing modes with clear indicators for continuity and pinout verification. Ideal for professional installers, it ensures reliable network connections while cautioning against use on live circuits.

Compatibility

Compatible Cable Types

- UTP (Unshielded Twisted Pair)
- STP (Shielded Twisted Pair)
- Coaxial Cable

Supported Connectors

RJ45, RJ11, RJ12, BNC

Operation

Testing Modes

Auto • Manual

Visual Indicators

- Power Status
- Continuity Verification
- Pinout Mapping

Safety Notice

Not for use on live circuits
