

Land Cruiser Race Series Shock Absorber

High-performance shock absorbers designed specifically for Land Cruiser race series vehicles. These shock absorbers provide superior damping and control, enhancing vehicle stability and handling in demanding off-road and racing conditions.

Overview

High-Performance Suspension Engineering

These shock absorbers are specifically engineered for Land Cruiser race series vehicles, delivering superior damping and control. Designed to enhance vehicle stability and handling, they excel in demanding off-road and racing conditions. With robust construction and optimized valving, this component provides the responsive performance and reliability required by professional racers and dedicated off-road enthusiasts.

Technical Specifications

Construction

Robust Build • Durable Materials

Application

Land Cruiser Race Series

Key Features

High-Performance, Off-Road Optimized, Enhanced Stability, Responsive Valving
