

Laptop Computer

This is a portable laptop computer designed for home and personal use. It provides a convenient solution for everyday computing tasks.

Product Overview

Advanced Security Communication System

This video intercom system provides a robust solution for residential and commercial security, enabling clear two-way audio and visual communication with visitors. Designed with a durable brushed metal finish, the unit integrates seamlessly into modern access control setups. It offers essential features such as door monitoring, visitor interaction, and photo capture capabilities to ensure comprehensive property surveillance.
