

Large Format Digital Printing Machine

This high-precision digital printing machine is designed for large format printing on various media. It features advanced printhead technology for vibrant and detailed images, along with a robust media handling system.

Product Overview

Professional Large Format Printing

The CR1802SF is a high-precision digital printing machine engineered specifically for large format applications. It integrates advanced printhead technology to deliver vibrant, detailed imagery alongside a robust media handling system that ensures consistent feeding. Designed for efficiency, the system includes user-friendly software to streamline production workflows for banners, posters, and large-scale graphics.

Technical Specifications

Model Number	CR1802SF
Ideal Applications	Banners, Posters, Large-scale Graphics

Key Features

Key Capabilities

- Advanced printhead technology for high-detail output
- Robust media handling system for consistent feeding
- User-friendly software for efficient workflow management
