

Large-Scale Mining Operation

This is a large-scale mining operation with a capacity of 4.0 million tons per annum. The site includes administrative buildings, processing facilities, and transportation networks.

Project Overview

National-Level Mining Operation

The Qinglong Well mining project represents a high-capacity industrial operation designed for excellence at the national level. With an annual production capacity of 4.0 million tons, this facility integrates advanced extraction infrastructure with modern architectural design. The site prioritizes high-efficiency output alongside established environmental stewardship practices.
