

Laser Cutting and Engraving Machine

This machine tool is designed for precision cutting and engraving of various materials using laser technology. It features a large, enclosed work area with transparent viewing windows and a control panel.

Overview

Precision Laser Processing

This industrial-grade laser cutting and engraving machine is designed for high-precision material processing. Featuring an enclosed work environment with transparent viewing windows, it ensures operator safety while allowing for real-time monitoring of the cutting or engraving process. The unit is mounted on a mobile wheeled base, offering flexibility for various workshop layouts and production requirements.

Design & Build

Mobility	Yes
Enclosure	Fully enclosed with transparent viewing windows
Control Interface	Side-mounted control panel

Capabilities

Processing Types	Laser Cutting, Laser Engraving
