

Laser Cutting and Engraving Machine for Garments and Shoes

This high-precision laser cutting and engraving machine is designed for garment, shoe, and accessory manufacturing. It is suitable for cutting and engraving a wide range of materials including fabrics, leather, acrylic, and wood.

Overview

Precision Laser Solutions for Fashion and Accessories

This high-precision laser cutting and engraving machine is engineered specifically for the demands of garment, shoe, and accessory manufacturing. It features a robust, enclosed frame for enhanced safety and consistent performance in industrial environments. Equipped with a versatile, movable cutting head, this system delivers exceptional accuracy across a wide variety of materials including delicate fabrics, durable leather, acrylic, and wood.

Technical Capabilities

Primary Functions

Laser Cutting • Laser Engraving

Compatible Materials

Fabrics, Leather, Acrylic, Wood

Design & Construction

Safety Features

- Enclosed laser system
- Robust industrial frame

Control System

User-friendly integrated control panel
