

Laser Cutting and Engraving Machine LC6090

The LC6090 laser cutting and engraving machine is designed for cutting and engraving various materials. It features a honeycomb worktable, safety-interlocked enclosure, and integrated controls for adjusting laser parameters.

Overview

Versatile Laser Precision

The LC6090 is a high-performance laser cutting and engraving machine designed to handle a diverse range of materials with exceptional accuracy. Built with a robust frame and integrated mobility casters, it combines industrial durability with ease of use. It is an ideal solution for prototyping, small-scale manufacturing, and educational environments, offering a reliable balance of safety and operational efficiency.

Technical Specifications

Model	LC6090
Key Features	Laser Cutting, Laser Engraving, Honeycomb Worktable, Safety Interlock, Integrated Cooling

Design & Construction

Mobility	Yes
Enclosure	Safety-interlocked with hinged lid

Operational Systems

Cooling System	Integrated ventilation and cooling
Control Interface	Integrated control panel for laser parameter adjustment
