

Laser Cutting Machine

This laser cutting machine is designed for precision cutting and engraving of various materials. It features a large working area, allowing for processing of sizable workpieces.

Overview

Precision Laser Processing

The LC1490 is a professional-grade laser cutting machine engineered for high-precision cutting and engraving tasks. Designed with a large working area, it accommodates sizable workpieces, making it an ideal solution for signage, prototyping, and diverse manufacturing applications. Equipped with a reliable CO2 laser source and an advanced motion control system, it ensures accurate and repeatable results for every project.

Technical Specifications

Laser Source	CO2
Motion Control	Advanced motion control system

Safety & Compliance

Safety Features	Enclosed laser chamber, Safety interlocks
-----------------	---

Applications

Suitable Applications

- Signage
- Prototyping
- Manufacturing
