Overview

J2 Series Laser Distance Meter

The J2 series laser distance meter is a precision instrument designed for accurate and efficient distance measurements in both home renovation and industrial applications. Featuring an integrated angle sensor and a robust, ergonomic design, this tool offers multiple operation modes including area and volume calculations. With IP54-rated protection against water and dust, it is built to withstand demanding environments while providing reliable performance.

Key Features

Key Features

Built-in Angle Sensor, IP54 Waterproof & Dustproof, Ergonomic Design, Large Capacity Storage, Multiple Operation Modes, Shock-proof Rubber Casing

Technical Specifications

Measurement Range by Model

Model	Range
J2-40	0.05-40m
J2-60	0.05-60m
J2-80	0.05-80m

Laser Specifications

- Laser Class: Class 2MII
- Wavelength: 620-690nm
- Output: <1mW

Power & Design

Power Supply

AAA7 Batteries • Rechargeable Lithium Battery

Design Details

- Weight: 160g
- Material: Environmental protection material with double-injection rubber
- Display: Backlit (can be turned off)
- Audio: Voice broadcast (optional), sound can be turned off
- Mounting: Compatible with external bracket
