

Laser Engraving Machine

This laser engraving machine is designed for engraving and cutting various materials with laser technology. It is suitable for applications such as manufacturing, prototyping, and artistic creation.

Overview

Precision Laser Engraving Solution

The LG1200 laser engraver is a professional-grade precision machine tool designed for high-accuracy engraving and cutting across a variety of materials. Engineered for versatility, it serves manufacturing, prototyping, and artistic applications with equal proficiency. The system features a robust frame, integrated safety enclosures, and a user-friendly interface, ensuring consistent results and ease of operation for demanding workflows.

Technical Specifications

Laser Power

1200 W

Model Series

Mobility Features

Casters Included • Mobile Base

Safety & Design

- Robust frame construction
- Integrated safety enclosure
- Hinged lid for work area access

Operational Capabilities

Suitable Applications

Application Category

Manufacturing

Prototyping

Artistic Creation

Control System

User-friendly interface for parameter adjustment and job management

Performance Metrics

High Accuracy, Repeatability, Consistent Results
