

Laser Engraving Machine with Stand

This laser engraving machine is a precision tool for engraving and cutting various materials. It features a fully enclosed cabinet for safety and dust control, along with a stand for easy mobility.

Overview

Precision Laser Engraving Solution

The LG500(STAND) is a precision laser engraver engineered for versatile cutting and engraving tasks across various materials. Featuring a fully enclosed cabinet with a transparent viewing window, it ensures both operator safety and effective dust control during operation. The system integrates a high-quality laser tube, advanced optics, and precise motion control to deliver repeatable, professional-grade results. Complete with a mobile stand, this unit is an ideal choice for industrial, commercial, and educational workshops.
