

# Laser Engraving Machine

This machine is easy to operate, increasing its popularity and utility. It is designed for precise cutting and engraving on a variety of materials.

## ADDITIONAL IMAGES

## Product Overview

### High-Precision Laser Processing

This versatile laser engraving and cutting machine is engineered for high-accuracy performance across a broad spectrum of materials. Designed with a robust construction and an advanced control system, it delivers stable operation suitable for both industrial manufacturing and commercial production. Whether processing delicate fabrics, wood, glass, or industrial hardware, this machine provides the reliability and precision required for professional-grade results.

## Technical Specifications

### Performance Highlights

**9060 mm**

Model 9060 Working Area

**1080 mm**

Model 1080 Working Area

### Key Features

High Precision • Fast Speed • Stable Operation • Advanced Control System

### Laser Technology

CO2 Laser

## Applications

### Industry Applications

- Clothing and Apparel
- Furniture Manufacturing
- Advertising
- Craft and Gifts
- Packaging and Paper
- Electronics and Appliances
- Automotive Parts
- Hardware

### Compatible Materials

Leather, Fabrics, Bamboo, Wood, Stone, Glass, Plastic, Rubber, Metal
