

Laser Line Level

This laser line level is designed for precision leveling and alignment. It projects a straight laser line for accurate reference and incorporates a bubble level for initial coarse leveling.

Product Overview

Precision Laser Leveling Solution

The EPT-SL02 laser line level is a professional-grade tool engineered for high-accuracy leveling and alignment tasks. It projects a clear, straight laser line to serve as a reliable reference for construction and installation projects. Built with durable materials, this device is designed to withstand demanding work environments while maintaining consistent performance.

Key Features

Core Functionalities

- Straight laser line projection
- Integrated bubble level for coarse leveling
- Secure locking mechanism
- Durable construction

Model Identifier

EPT-SL02

Operation

Operation Modes

Locked • Unlocked
