

# Laser Marking Machine for Wood Cases

This is a specialized laser marking machine designed for engraving wooden cases. It features a computer-controlled system for precise design input and control.

## Product Overview

### Professional Wood Marking Solution

This specialized laser marking system is engineered specifically for the precision engraving of wooden cases. Equipped with an advanced cross-positioning red light system, it allows for effortless and accurate alignment of designs directly onto wooden surfaces. The integrated workstation provides full control over marking parameters, ensuring high-quality, repeatable results for various industrial wooden packaging applications.

## Technical Specifications

### Control System

- Integrated Computer
- Dedicated Monitor
- Keyboard and Mouse Interface

### Cooling System Model

CW-3000 Industrial Chiller

### Positioning Technology

Cross Positioning, Red Light Alignment

## Performance

### Device Class

Laser Marking Machine • Wooden Case Engraver
