

Laser Metal Board Cutting Machine

This high-precision laser metal board cutting machine is designed for industrial use. It utilizes advanced laser technology for efficient and precise cutting of metal boards.

Product Overview

Industrial Laser Cutting Solution

The YM-3015 is a high-precision laser metal board cutting machine engineered for rigorous industrial applications. Utilizing advanced laser source technology, it delivers exceptional efficiency and accuracy across a variety of metal types and thicknesses. Its robust construction ensures stability during operation, while the user-friendly interface allows for seamless integration into manufacturing, fabrication, and prototyping workflows.

Technical Specifications

| | |
|----------------------|---|
| Model Number | YM-3015 |
| Primary Applications | Manufacturing, Fabrication, Prototyping |

Key Features

Performance Metrics

3015 mm

Cutting Area Size

Key Benefits

- High-precision cutting capability
- Robust industrial construction
- Advanced laser source technology
- User-friendly control interface
