

Latex Coated Work Gloves

These work gloves feature a latex coating for enhanced grip and protection. The knitted fabric provides a comfortable fit and reduces hand fatigue, while offering abrasion resistance.

Product Overview

Professional Protection and Grip

These latex palm coated gloves are designed for durability and flexibility in demanding work environments. Featuring a robust crinkle finish for superior grip, the gloves are built with a 10-gauge polyester shell that balances protection with breathability. They are an ideal choice for construction, gardening, and general handling applications where hand safety and comfort are essential.
