

Lawn Mower Steering Wheel

This weldment steering wheel is designed for lawn mowers. It features robust construction and a handle for easy gripping and maneuverability.

Product Overview

Professional Mower Steering Weldment

This specialized weldment serves as the primary steering assembly for commercial and residential lawn mowers. Engineered for structural integrity and operator comfort, the unit features a reinforced design with an ergonomic handle for superior maneuverability. Its robust construction is finished with a protective coating to ensure long-term durability in outdoor mowing environments.

Technical Specifications

Manufacturing Processes

- Stamping
- Machining
- Welding
- Paint Application

Finish

Black Paint • Corrosion Resistant

Model ID

136K74

Application

Primary Application

Lawn Mower, Steering System, Weldment Assembly
