

Lawn Soil Compaction Roller

This garden tool is used for flattening soil, grass, and other materials. It smooths surfaces, compacts new seed, and presses down sod.

Overview

Professional Lawn Soil Compaction Roller

This garden lawn roller is an essential tool designed for flattening and compressing soil, grass, and newly seeded areas. It features a robust design suitable for smoothing out uneven surfaces and ensuring optimal soil contact after sod installation. By filling the cylinder with water or sand, users can adjust the weight to achieve the desired level of compaction for residential lawns or recreational areas.

Dimensions

Length	1010 mm
Width	540 mm
Height	320 mm

Usage

Common Applications	Lawn Leveling, Soil Compaction, Sod Installation, Seed Bed Preparation, Sports Field Maintenance
